

CONCRETE INNOVATIONS IN CAYMAN

Carib Cement's First Concrete Seminar

Carib Cement in association with Monsen & Wood Shipping Ltd hosted their first concrete seminar on Wednesday 21st October at the Marriott Grand Cayman Beach Resort. The seminar was officially declared open by Mr. Perry Powell, Deputy Chief Officer in the Ministry of Community Affairs and Housing who represented the Hon. Minister.

A full house viewed presentations from experts in the field on topics which included the characteristics of portland cement concrete; mixing concrete –aggregates, proportioning, handling, quality, and testing and the suitability and versatility of blended cement.

Still reeling from the success of the first seminar and probably already discussing a follow-up seminar, are from left: Sean Wood, Managing Director of Monsen & Wood Shipping Ltd, distributors of Carib Cement Plus; Tasty Blackman, Carib Cement's Business Development Consultant; Perry Powell, Deputy Chief Officer of the Ministry of Community Affairs and Housing who declared the seminar open; Lystra Sharp, Public Relations Officer and Chester Adams, Quality Manager, both of Carib Cement.

Dr. Robin Osborne, right, chats one to one with Chester M. Watter at the end of Concrete Innovations.

Participants of the Concrete Seminar

Brendon Lyons, right, makes a concrete point to Stefan Baraud.
